

SECTION 01 33 91

COMMISSIONING SUBMITTALS

PART 1 - GENERAL

1.01 SUBMITTAL REQUIREMENTS FOR COMMISSIONING

A. Normal Submittals:

1. The Commissioning Agent will receive a copy of the normal submittals for equipment to be commissioned.
2. The Commissioning Agent will review and approve normal Contractor submittals applicable to systems being commissioned for compliance with commissioning needs, concurrent with the Designer reviews.

B. Data for Commissioning:

1. The Contractor will receive a written request from the Commissioning Agent requesting specific information needed about each piece of commissioned equipment or system.
2. Typically this will include detailed manufacturer installation and start-up, operating, troubleshooting and maintenance procedures, full details of any Owner-contracted tests, fan and pump curves, full factory testing reports, if any, and full warranty information, including all responsibilities of the Owner to keep the warranty in force clearly identified. In addition, the installation and checkout materials that are actually shipped inside the equipment and the actual field checkout sheet forms to be used by the factory or field technicians shall be submitted to the Commissioning Agent.
3. The Commissioning Agent may request further documentation necessary for the commissioning process.
4. This data request may be made prior to normal submittals.
5. Much of this information is contained in the regular O&M manual submittals normally submitted in the project. Typically, this information is required prior to the regular formal O&M manual submittals.

C. Contractor's responsibility for deviations in submittals from requirements of the Contract Documents is not relieved by the Commissioning Agent's review.
